+91 9916645955 @ me@akshayd.com github.com/Aks-Dmv linkedin.com/in/akshay-dharmavaram-213a68152/

EDUCATION

Carnegie Mellon University (CMU), Pittsburgh, USA

ONGOING

- > M.S. in Robotics [2022]

Birla Institute of Technology and Science, Pilani (BITS), Goa, India

CGPA: 9.10/10.00

- > B.E. (Hons.) Computer Science [2020] *Thesis: Convergence of Hierarchical Policy Gradients*
- > B.E. (Hons.) Electrical and Electronics Engineering [2020] *Thesis: Continuous Control using Continuous Options*

PUBLICATIONS

Dharmavaram, A.; Riemer, M.; Bhatnagar, S. "Hierarchical Average Reward Policy Gradient Algorithms (Student Abstract)"
AAAI 2020: In Proceedings of the Thirty-Fourth AAAI Conference on Artificial Intelligence

SELECTED RESEARCH EXPERIENCE

Indian Institute of Science(IISc), Bangalore | Stochastic Systems Laboratory

MAY 2019 - MAY 2020

Research Assistant | Advisor: *Prof. Shalabh Bhatnagar*, Chairman of the Dept. of Computer Science and Automation

- > CS thesis: Hierarchical Natural Option-Critic Algorithms
 - > Proved the convergence of hierarchical average reward policy gradient algorithms, which learn long term temporal abstractions for achieving the globally optimal sequence of rewards, using the ODE based approach
 - > Increased the sample-efficiency by 2.8x by incorporating natural gradients using K-FAC
 - > Increased throughput by over 100x by parallelizing the sampling procedure over 128 processors
 - > Created 3 specialized environments with "traps" to illustrate our framework's enhanced credit-assignment capabilities
- > EEE thesis: Continuous Control using Continuous Option Spaces
 - > Derived the deterministic hierarchical policy gradient for continuous action spaces and discrete option spaces
 - > Developed a novel framework that alleviates the option-collapse issue by using continuous option spaces

Birla Institute of Technology and Science, Pilani

MAY 2018 - MAY 2019

Research Assistant | Advisor: *Prof. Bharat M. Deshpande*, Associate Dean of Academic Graduate Studies & Research Division

- > Formulated a novel mapping from the policy space of Reinforcement Learning (RL) algorithms to the space of hierarchical cluster trees in order to learn a clustering policy that can dynamically conform to accommodate an influx of new data points
- > Created a customized environment that can interface any RL algorithm with any clustering dataset
- > Used the DDPG algorithm to obtain for the first time the ground truth clustering strategy for an adapting synthetic dataset

Central Electronics Engineering Research Institute (CEERI), Pilani | Control and Automation

MAY 2017 - JULY 2017

Research Intern | Advisor: *Dr. Jagdish Lal Raheja*, Chief Scientist and Head of Control and Automation

- > 1st Project: Real-time human detection and distance estimation using a Xilinx ZC702 board
 - > Reduced the time taken for humanoid detection by 16x by employing support vector machines, histogram of oriented gradients, and epipolar geometric principles.
- > 2nd Project: Image segmentation using Hidden Markov Models (HMM)
 - > Employed Markov Chain Monte Carlo Algorithms for learning a Hidden Markov Model (HMM) for image segmentation
 - > Pipelined the HMM into the principal image-stitching code-base, which was used for image stitching in VR

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

International Institute of Information Technology (IIIT), Hyderabad, India

JULY 2018

Computer Vision and Machine Learning Summer School Scholar

- > Handpicked for a graduate summer school taken by researchers from labs such as Facebook AI and Microsoft Research.

EEE F313 Analog and Digital VLSI Design | CS F111 Computer Programming

AUGUST 2018 - MAY 2019

Senior Teaching Assistant, managed 5 Junior TA's and was responsible for 70 students

- > Conducted both theoretical and practical recitation sessions for 3 hrs every week and also graded the final design projects

HONORS AND AWARDS

[2019] Summer Research Scholarship for top 3 students | BITS Alumni Affairs

[2018] Excellency in Teaching Assistantship awarded to the top 1% of TA's | BITS, Pilani

[2017] Probabilistic Graphical Models Honors Specialization [certificate] (completed as a sophomore) | Coursera

[2016] Merit-based 50% Fee Waiver for top 2% academically proficient freshmen | BITS, Pilani
